

ABSTRACT

An object of the present invention is to cover a removable portion and to thereby prevent an absorbent portion from inadvertently coming off a fitting portion. The worn article of the present invention includes a fitting portion 1 that fits around a torso of a wearer, and an absorbent portion 2 covering a crotch of the wearer and absorbing body fluid from the wearer. The absorbent portion 2 includes a first end portion 23 and a second end portion 24 that are connected to the fitting portion 1. The first end portion 23 of the absorbent portion 2 can be detached from the fitting portion 1. A cover sheet 4 is provided covering at least a portion of the first end portion 23. A portion of the cover sheet 4 is processed so that the cover sheet 4 is tearable.
